

**EXTERIOR  
SURFACE  
CLEANER**  
**GREEN WASTE  
CLEANER**

## ENZYME BASED FORMULA

**Cleaning and treatment of exterior surfaces in natural stone (blue or white stone, marble, travertine, etc.) and walls, roofs, garden furniture, photovoltaic and signaling panels, etc.**

### PROPERTIES

- Works quickly and without rubbing on all types of exterior deposits.
- Safe for materials such as: bricks, concrete, natural and reconstituted stones, plaster, tiles, slates, wood, plastics and synthetic materials.
- Safe for zinc and metallic materials
- Neutral formulation. Does not contain acid or hypochlorite.

### USER INSTRUCTIONS

- Remove easily detachable debris from the surface to be treated.
- Do not apply when it is raining.
- Dilute according to the amount of dirt (see dilution)
- Apply evenly and abundantly using a low pressure sprayer.
- Leave to act for 1 to 3 days depending on the condition of the surface.
- If necessary, a light brushing can eliminate the last residues.
- If the surface must be painted after treatment, rinse thoroughly with clear water before application.

### DOSAGE

**DIRTYING:**  
Normal  
Important

**DILUTION:**
